Document Title : *a convenient method of preparing some new pyrimidotriazine derivatives as biocidalagents*
اوفق طريقة لتحضير بعض مشتقات بيريميوترايازين الجديدة كعوامل بيولوجية

Document Language : Arabic

Abstract : In the present work, we found to a convenient method of preparing some new pyrimidotriazine derivatives from ring closure reactions of 2-amino/hydrazino pyrimidinone compounds with α,α -bifunctional oxygen and halogens. Structures of the products have been deduced by the of elemental and spectral data. Biocidal effect of these products have been evaluated towards some bacteria and fungi in compare two antibiotics were compounds 9d > 26 > 10 > 4 > tested standard antibiotic.
